

INART 258

Working with the W7 keyboard

ON/OFF switch: on back of keyboard, right side

Press the VOICE button.

Press the Bank INC/DEC keys (F6 and F7 below the LCD).

Watch the upper left area of the LCD as the instrument cycles through its banks.

Select the bank that begins with G.

Press the UTILITY button.

Then press F6 to the to the MIDI page.

Be sure that Local Control is set to ON.

The Mac and the W7

To test MIDI communications, launch the Audio/MIDI setup program.

Be sure that Fastlane USB icon and the W7 icon are not greyed out, and that they are connected. (The Default configuration from the pulldown menu.)

Launch the MIDI monitor program.

Click the Filter arrow.

Uncheck the System Common and Real Time boxes.

Leave the Voice Messages boxes checked.

Play some notes on the W7 keyboard. You should see information about the MIDI messages you are sending in the MIDI monitor window.
